Objective

Aspiring medical engineering professional pursuing a degree in Artificial Intelligence and Data Science at Amrita Vishwa Vidyapeetham (2024–2028). Passionate about exploring emerging technologies and leveraging innovative solutions in healthcare applications. Eager to contribute to advancements in your company through dedication to learning and technical expertise.

Education

B.Tech, AI & Data Science (Medical Engineering)
Amrita Vishwa Vidyapeetham (2024–2028)

12th CBSE — The Akshaya Academy, Tamil Nadu (2024) — 84.4%

10th CBSE — Shri Maharishi Vidya Mandir, Tamil Nadu (2022) — 94.6%

Skills

- **Programming & Data Technologies:** Python, SQL, Data Visualization, Machine Learning, Deep Learning, Data Science, MATLAB, Power BI, Java
- **AI & Cloud Technologies:** Artificial Intelligence, Cloud Computing, Google Cloud AI
- **Cybersecurity & Privacy:** Cybersecurity, Identity and Access Management (IAM), Dark Web & Privacy Awareness
- **Professional Skills:** Problem Solving, Communication Skills, Team Collaboration

Internship Experience

Internship: Data Science
Arttifai Tech
Duration: 28th July 2025 – 4th August 2025

- Successfully completed a 7-day internship in Data Science at Arttifai Tech.
- Demonstrated enthusiasm, dedication, and a strong willingness to learn in real-world data science projects.
- Recognized for valuable efforts and active participation in experiential learning environments.

Virtual Internship: Machine Learning
CodeAlpha (MSME, Govt. of India recognized)
Duration: 1st October 2025 – 30th October 2025

- Actively participated in the CodeAlpha Virtual Internship Program focusing on Machine Learning.
- Gained hands-on exposure to real-world ML concepts, teamwork, and project implementation.
- Recognized for dedication, proactive learning, and strong professional development.

Job Simulations & Virtual Experiences

Tata Cybersecurity Security Analyst Job Simulation on Forage
November 2025

- Completed a job simulation involving identity and access management (IAM) for Tata Consultancy Services.
- Acquired expertise in IAM principles, cybersecurity best practices, and business alignment.
- Delivered comprehensive documentation and presentations, showcasing effective technical communication.

Deloitte Australia Cyber Job Simulation on Forage
November 2025

- Completed a job simulation analyzing web activity logs and supporting a client during a cybersecurity breach.
- Identified suspicious user activity through data interpretation and incident response practices.

Projects

Osteoporosis Risk Prediction Using XGBoost

- Developed a predictive model using the XGBoost algorithm to assess osteoporosis risk from clinical and lifestyle data.
- **Result:** Achieved high accuracy (92% training, 91% test) and enabled healthcare providers to make early, personalized intervention recommendations.

Pollution Monitoring Control in Vehicles (Arduino + Gas Sensors)

- Designed and implemented an IoT-based system using Arduino and multiple gas sensors (MQ2, MQ9, MQ135, PM2.5) for real-time vehicle emission detection and control.
- **Result:** Demonstrated low-cost and effective real-time monitoring, triggering emission control mechanisms and supporting cleaner air initiatives.

Efficient 3D Protein Structure Storage Using SVD and Hashing

- Developed a retrieval system for protein structures using Singular Value Decomposition (SVD) for dimensionality reduction and SHA-256 hashing for rapid, scalable indexing and search of geometric features from 3D protein C-alpha coordinates.
- **Result:** Achieved high-speed, accurate identification of structurally similar proteins, with over 81% precision and 78% recall, supporting scalable bioinformatics tasks such as structure comparison and drug discovery.

Certifications & Courses

- Innovating with Google Cloud AI — Google Cloud (via Simplilearn SkillUp)
- Introduction to Dark Web, Anonymity, and Cryptocurrency — EC-Council Continuing Education
- Getting Started with Artificial Intelligence — IBM SkillsBuild
- Jailbreaking LLM (Anokha 2024)
- Decodex Event (Kanam 2025)
- Generative AI Tools (Skill Nation)
- Object Detection with Deep Learning (MathWorks)
- Explore Data with MATLAB Plots (MathWorks)
- Power BI Workshop (Office Master)
- AI Fundamentals Course (TATA NEUSKILLS)

Extra-Curricular

- Editing photos and videos
- Sports
- Playing video games
- Exploring new technologies
